- |                                       |           |
|---------------------------------------|-----------|
| • Computer Architecture               | - 75      |
| • Web Application Development         | - 80      |
| • Object Oriented Programming         | - 85      |
| • Database Design and Development     | - 73      |
| • Data Structures and Algorithms      | - 75      |
| • Mobile Application Development      | - 90      |
| • Final Computing Group Project       | - 70      |
| • Analytics and Business Intelligence | - Pending |
| • Computational Intelligence          | - Pending |
| • SE Dissertation Project             | - Pending |
| • Advance Programming                 | - Pending |

## Professional Skills

Python

HTML/CSS

JavaScript

Node js

React

PHP

SQL

Java

Android Development

Problem Solving

## Soft Skills

- Team Work
- Communication

## Achievements

Cutting Edge - Participation (03/2021)

Zahira College Video Editing Competition - 1st Place

International Computing Driving License - Distinction

English Speaking British Council - Honors

## Organizations

Hejaaz International Computer Society (05/2017 - 05/2018)

*Secretary*

Hejaaz International Science Society (02/2018 - 10/2018)

*Chairperson*

Rotaract Club of ICBT

*Member*

## Projects

### Saloon App (11/2021 - 01/2022)

- An android application developed using Java and OOP concepts. In this app, there are 2 authentication levels - Customer and Admin. The customer can book an appointment directly from the app and also view/ edit and cancel appointment schedules, Where else the admin can edit/ cancel and calculate the total bill with logs for the appointments

### Personal Website (01/2022 - 02/2022)

- A single-page Personal website developed using HTML/CSS and ES6 JavaScript.

### E commerce Website (02/2022 - Pending)

- An e-commerce website using Js frameworks React js & Node js. Auth0 is used for login. The user can select items and add them to the cart. Payment is also integrated using stripe

### Gym Website (10/2021 - 11/2021)

- A Website made for a Gym using Html/Css, Php, Javascript and for the database MySQL is used. There is an authentication for the customer and the customer can register and login to the website or continue as a guest. The customer can view memberships varying from four types and the user can purchase only if he is logged in. There are also supplements of different types and the same concept applies as before.

### Typing Speed Test (10/2021 - 11/2021)

- A python program to check the WPM with some styling also done in the terminal using curses library

### Bookshop Application (09/2021 - 10/2021)

- A sophisticated bookshop management application designed using Java with a user friendly UI. There are two users who are Manager and Cashier. The Manager can create new accounts for him and cashier and also Add/Edit/Delete and view books. The Cashier can only Add/Edit/Delete and View Books.

## Interests

Learn about Web3 and Blockchain Development.

Researching on Artificial Intelligence and Machine Learning

Researching on AWS & Big Data

Contribute to open-source Projects and organizations
